Objective

MCA final-year student and AI/Data Science fresher with strong knowledge of Python, Machine Learning, Data Science, and AI-based application development. Skilled in building real-time projects using Python, FastAPI, Streamlit, SQL, and IoT technologies. Passionate about solving real-world problems through intelligent systems and data-driven solutions. Seeking an internship opportunity to apply technical skills, gain industry experience, and contribute to innovative development projects.

Technical Skills

- **Programming Languages :** Python
- **Frameworks & Libraries :** NumPy, Pandas, Matplotlib, FastAPI, Streamlit
- **Generative AI:** LLMs, Prompt Engineering, Zero-shot & Few-shot Prompting
- **Databases:** MySQL, SQLite
- **Tools & Platforms:** GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab, Cursor, Emergent
- **Core Concepts:** (OOPs), File Handling, Exception Handling, CRUD Operations
- **LLM Concepts:** Tokenization, Embeddings, Context Window, Transformers, Inference
- **Advanced:** RAG, Fine-tuning (Basics), Hallucination Handling, Guardrails
- **IoT:** ESP32, Arduino, Sensors, Cloud Integration (ThingSpeak)

Projects

Student Management System

Tech Stack: Python, FastAPI, Streamlit, SQLite

- Developed a CRUD-based student management application using FastAPI and Streamlit.
- Implemented functionalities for student record creation, update, deletion, and retrieval.
- Designed an interactive user interface for efficient data management and visualization.
- Improved backend performance and API handling for seamless user experience

Health Insurance Evaluation System

Tech Stack: Python, Streamlit, SQLite

- Built a health insurance evaluation application with CRUD functionality.

- Processed and analyzed user data for insurance-related insights and management.
- Developed an interactive Streamlit dashboard for data input and reporting.
- Enhanced data organization and retrieval using SQLite database integration.

AI Portfolio Project

Tech Stack: AI Tools & Platforms

- Created multiple AI-based content and productivity workflows using modern AI tools.
- Utilized AI platforms for coding assistance, automation, image generation, and presentations.
- Explored AI-driven solutions for research, technical documentation, and creative tasks.
- Gained hands-on experience with 85+ AI tools and emerging technologies.

Internship Experience

IoT Intern – Incubators Systems Pvt. Ltd., Pune (Jan 2026 – Feb 2026)

- Worked with sensors and actuators using ESP32, Arduino, and Raspberry Pi.
- Implemented real-time device communication and networking protocols.
- Integrated cloud services for data acquisition, storage, and remote monitoring.
- Proposed an AI-based roadmap for predictive fault detection and system automation
- Collaborated with cross-functional team members to design, test, and troubleshoot IoT solutions

Data Science, ML & GenAI Intern – Incubators Systems Pvt. Ltd. Pune Present

- Working on Data Science and Machine Learning concepts using Python and SQL
- Applying (NLP) techniques for text analysis and data processing
- Implementing Generative AI tools for coding assistance, automation, and productivity tasks
- Using AI tools for image generation, video generation, research, and content creation
- Exploring AI-based workflows for automation, presentations, and technical documentation

Education

- SSC – Maharashtra Vidyalaya, Barshi, Solapur (2018)
- HSC Maharashtra Higher Secondary Vidyalaya Barshi, Solapur (2020)
- Master of Computer Applications (MCA)
Sharda University, Greater Noida (2024 – 2026)

- Bachelor of Computer Applications (BCA)
Bharati Vidyapeeth, Pune (2020 – 2023)

CERTIFICATIONS & LEARNING

- AI BootCamp — Learned and explored 85+ AI tools and platforms
- Data Science & Machine Learning Training
- Python Development Practice Projects

Achievements & Activities

- Participated in Mega Ideathon 2026
- SuperX IoT Exhibition (Core2Web)
- AI & Placement MasterClass Seminar
- Marketing Intern – Core2Web Ambassador Program
